

Recipient Name and Address

Re: Client Name, DOB, Address

Dear Recipient Name,

The following report is a comprehensive psychological evaluation of Client Name.

Provide a summary of the purpose of the evaluation and the client's associated presenting concerns. Describe any relevant personal information e.g., age and gender of client; cultural background; and any modifications or assistive measures required for the evaluation or other context leading to the assessment.

Information sources:

List clinical interviews, psychometric assessments, and third-party documents used to inform the report.

Personal and developmental history:

Provide summary of early development, family history, education, employment, current living arrangements, trauma history, and family mental health history.

Medical status and medical history:

Describe previous non-psychiatric diagnoses, medical conditions, and treatment responses.

Mental health history:

Detail previous mental health diagnoses, psychiatric conditions, psychological interventions, hospitalisations, and treatment responses.

Medication history:

List current medications with doses and frequencies, past medication responses, side effects, and adherence.

Drug and alcohol use history:

Summarise current and past substance use including alcohol, tobacco, recreational drugs, and prescription medication misuse.

Other addiction history:

Detail potentially problematic addictive behaviours such as gambling, gaming, internet use, or other behavioural addictions.

Legal and forensic history:

Describe history of illegal activity, justice system interactions, imprisonment, family law involvement, or domestic violence.

Current presentation:

Provide detailed summary of current symptoms, duration, external stressors, relationship factors, functional impact, lifestyle indicators, sleep patterns, diet, physical activity, and social functioning.

Mental status examination (MSE):

Provide narrative summary of appearance, behaviour, speech, mood/affect, thought process, thought content, perception, cognition, and insight/judgment.

Strengths, coping skills, recreational interests, and hobbies:

Summarise client strengths, positive coping mechanisms, interests, and protective factors.

Psychometric assessment:

For each assessment, provide name, description, administration date, purpose, quantitative results, interpretation, and clinical implications.

Functional assessment:

Describe current functioning across daily living skills, social/interpersonal functioning, occupational/academic functioning, and self-care/independence.

Formulation/impression:

Provide bio-psycho-social formulation including predisposing, precipitating, perpetuating, and protective factors, with psychodynamic elements if applicable.

Diagnosis:

Detail diagnostic impressions, if stated by the clinician, based on DSM-5-TR and ICD-11 criteria, with rationale, relevant criteria met, supporting evidence, codes, and differential considerations.

Risk:

Assess risk of suicide, self-harm, harm to others, or relapse, including past attempts, psychosocial stressors, and protective factors.

Recommendations:

Detail the clinician's recommendations regarding medication, non-pharmacological interventions, referrals, diagnosis-specific management, lifestyle modifications, workplace/academic accommodations, follow-up plans, and safety planning.

Prognosis:

Provide clinician's opinion on likely course of presenting conditions, influencing factors, and likelihood of improvement with recommended interventions.

Summary:

Brief paragraph summarising the evaluation, formulation, and diagnosis.

Yours sincerely,

Clinician Name
